

Business Recycling

AB341 COMPLIANCE

Emadco is offering free recycling audits

We will closely review your work location's overall waste stream to identify material that can be recycled.

The information gained from the analysis will provide Emadco with the information needed to create a comprehensive recycling program that specifically meets your company's needs.

The purpose of the law is to:

-  Reduce garbage heading to the landfills
-  Reduce greenhouse gas emissions
-  Conserve resources and increase the availability of materials for recycled-content manufactures
