

SCARY NEWS

SPOOKY HALLOWEEN

IT'S COMING, ARE YOU READY?

Why is EMADCO offering organic waste service?

We are now offering a residential organic recycling program to comply with a new state law known as SB 1383 and reduce organic waste.

How do I know if I am required to have residential organic service?

Madera County along with EMADCO have already contacted households that are required to participate.

If you're not sure whether you're in the SB 1383 compliance area, use Madera County's look-up tool at maderacounty.com/sb1383.

**We live in the green
organic cart!**

What items can go in the green cart?

Food scraps like fruits and vegetables, cooked meat and bones, eggshells, nutshells, breads, rice, and pasta are all good to go in the green cart.

So are yard trimmings, grass clippings, and untreated wood.

Even food-soiled paper like napkins, paper towels, and pizza boxes.
