

Our Zero Waste Team is here to help your business! AB 1826

Commercial Organic Recycling

Emadco's Zero Waste Team offers a variety of services and programs to help you implement sustainable processes into your business routines.

To comply with AB 1826, applicable businesses must perform one of the following actions:

- 1 Subscribe to a recycling service for organics
- 2 Self-haul organics and/or other recyclable items to a verifiable recycler
- 3 Operate an on-site organics recycling program in compliance with state and local laws
- 4 Donate or sell organic materials
(not typical)

Contact us for more information and assistance with implementing or expanding recycling at your work place, including state mandated organic recycling and surplus food donations.

The following tools are offered to businesses free of charge.

Service Evaluation

A service evaluation is an analysis of your businesses waste stream. It can identify what types of recyclable materials and waste your business generates and how much of each type is recovered through waste reduction, reuse, and recycling. Using the information collected during our visit, Emadco can help your organization get the right size waste and recycling services to help you save money and resources.

Technical Assistance

Emadco's Zero Waste Team can help your business implement programs that can help you monitor food waste, recycling programs, set up donation services, increase employee participation and more.

Supplies, Signage and Training

To ensure that your recycling and waste reduction plan is effective, Emadco can provide an array of materials for your business. An effective waste reduction plan hinges on the participation and support of employees, managers, and customers. It involves rethinking the way we do things and creating new sustainable habits. Staff will present an interactive training presentation that will emphasize the benefits of waste reduction and recycling.
